FULL STACK DEVELOPER

A fullstack developer who has demonstrated great problem solving skills and is quick to learn. Currently studying material to acquire AWS cloud developer certification in addition to a rigorous General Assembly coding bootcamp.

TECHNICAL & INTERPERSONAL SKILLS

Languages: JavaScript, HTML, CSS, SQL, Mongo, EJS

Libraries and Frameworks: Express.js, Bootstrap

Databases and other: MongoDB, RESTful Routing, JSON API

Interpersonal skills: Collaborative, problem solving ability, adaptability, empathy, communication

TECHNICAL PROJECTS

Rate My Closet - [GitHub](#) | [App](#) - HTML | CSS | Javascript | Node.js | Postgresql | Express | React.js | Typescript

- Users are able to login and upload photos of their outfits then create, update, render and delete a post.
- Implemented a fully functional web application using PERN stack (Postgresql, Express, React, Node).
- Utilized TypeScript and Vite in the front-end.

restfulRooms - [GitHub](#) | [App](#) - HTML | CSS | Javascript | Node.js | MongoDB | Express | React.js

- Worked in a team to produce a MERN (MongoDB, Express, React, Node) stack application with full CRUD capability on the listing resource that allows users to post, reserve, and review listings.
- Utilized GitHub workflow to coordinate pull requests

myDietFriend - [GitHub](#) | [App](#) - HTML | CSS | Javascript | Node.js | MongoDB | Express |

- Users are able to log in using their google accounts and then are able to keep a daily log of fats, protein, carbs and calories of each meal/food they consume. They are able to also log their daily goals and workouts.
- Utilized Restful Routes and MongoDB, Express, and Node js (MEN stack) to perform create, render, update, delete (CRUD) operations to enable the users to interact with the resources.
- Ensured secure log in and protected routes using Google OmniAuth.

Dancing Troopers - [GitHub](#) | [App](#) - HTML | CSS | Javascript

- Players are able to click on the board and have storm-trooper themed pieces drop down as is desired in a standard connect-4 .A winner is determined when 4 pieces are aligned vertically, horizontally, or diagonally.
- Used win/loss logic to render win/loss messages on HTML using DOM manipulation.
- Used CSS and CSS flex-box to create the game-board and overall styling.

EXPERIENCE

Derma Gym, e-commerce

Remote 06/2021 - 11/2022

- Coordinated the distribution of skin care devices from a wholesaler to the customer by ensuring order requests are sent to wholesalers and by promptly responding to any customer complaints and questions.
- Maintained and created a shopify web-site store-front
- Formulated and implemented a social media based marketing strategy in order to increase website traffic and order requests

EDUCATION

General Assembly

Remote, Certificate Expected: 03/2023

Full-stack software engineering 420+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies.

University of Georgia, Bachelor of Public Health

Athens, Georgia, Graduated: 05/2016
